Clinical Notes .

Chemical Pathology

Specimen type - Blood-Serum

11-Jan-2025 11.19AM

OXIDISED LDL	RESULT	REF - RANGE	UNITS
Oxidised LDL	58.0	 < 70.0	U/L

Lipoproteins Comment

OXIDISED LDL LEVEL - WITHIN NORMAL LIMITS:

Low risk of developing CVD. Raised Oxidised LDL levels occur from many causes including smoking, poor blood sugar level control, diets high in trans fat and diets poor in antioxidants. Elevated Oxidised levels are also seen more frequently in diabetic patients than non-diabetics.
