LIVER FUNCTION TESTS		RESULT	REF - RANGE	UNITS
Bilirubin (Total)	5		1 - 20	umol/L
ALP	145 H		30 - 110	U/L
GGT	85 H		5 - 50	U/L
ALT	26		5 - 40	U/L
AST	30		5 - 35	U/L
Protein, Total	66		60 - 80	g/L
Albumin	45		33 - 48	g/L
Globulin	21 L		26 - 39	g/L

LFT Comments

ELEVATED ALKALINE PHOSPHATASE:

In adult patients, Alkaline phosphatase can be elevated in liver cholestasis, bone disease with increased osteoblastic activity e.g. Paget's disease. An elevated result may be due to some gastrointestinal diseases.

GAMMA-GLUTAMYLTRANSFERASE ELEVATED:

Gamma glutamyl transferase (GGT) Elevated: Increased levels may be found in diabetes, cholestatic liver disease and in hepatocellular disease.

Methodology

Automated Chemistry/Immunochemistry
