GIT ASSESSMENTS

STOOL, SPOT	Result	Range	Units	
Pancreatic Elastase 1	>500	> 200	ug/g	

Digestive Markers Comment

PANCREATIC ELASTASE: Normal exocrine pancreatic function. Pancreatic Elastase reflects trypsin, chymotrypsin, amylase and lipase activity. This test is not affected by supplements of pancreatic enzymes. Healthy individuals produce on average 500 ug/g of PE-1. Thus, levels below 500 ug/g and above 200 ug/g suggest a deviation from optimal pancreatic function. The clinician should therefore consider digestive enzyme supplementation if one or more of the following conditions is present:
Loose watery stools, Undigested food in the stools, Post-prandial abdominal pain, Nausea or colicky abdominal pain, Gastroesophageal reflux symptoms, Bloating or food intolerance.
