MICROBIOLOGY

STOOL, SPOT Result Range Units

Faecal Virus Profile

Enteric Viral Pathogens Profile:

Norovirus GI and GII:	DETECTED
Rotavirus A:	Not Detected
Adenovirus F40/41:	Not Detected
Sapovirus (genogroups I, II, IV, V):	Not Detected
Human Astrovirus (hAstro):	Not Detected

COMMENT:

Not Detected results indicate the absence of detectable DNA in this sample for the viral pathogens reported.

For further information about this report, please contact NutriPATH on 1300 688 522.

NOROVIRUS:

Faecal contamination of ingested foods and water. Common cause of diarrheal (winter vomiting virus-Norwalk) in adults, causing outbreaks on cruise ships/hospitals/nursing homes
Symptoms include nausea and vomiting, diarrhoea, abdominal cramps, low-grade fever, muscle aches, fatigue, and headache. Short-lived, lasting about 24-72 hours. Acquired immunity is short-lived.
A repeat test for Enteric Viral Pathogens should be requested to ensure that the virus has cleared.

Treatment:

Conservative hygiene measures such as handwashing, Hydration and strict isolation is recommended for cases as such. Other immune modulators that may be beneficial are Vitamins A, C, and D, zinc, Echinacea.
