SALIVA	Result	Range	Units	
<b>Saliva Minerals and Metals</b>				
Chromium, Saliva	<1.40	0.00 - 3.00	ug/L	
Cobalt, Saliva	0.29	0.00 - 2.50	ug/L	
Molybdenum, Saliva	0.56	0.00 - 3.50	ug/L	
Copper, Saliva	0.07	0.00 - 0.07	ug/L	
Cadmium, Saliva	<0.76	0.00 - 2.00	ug/L	
Gallium, Saliva	0.28	0.00 - 1.00	ug/L	
Iridium, Saliva	<0.23	0.00 - 1.00	ug/L	
Mercury, Saliva	<1.41	0.00 - 3.00	ug/L	
Nickel, Saliva	7.55 *H	0.00 - 2.00	ug/L	
Palladium, Saliva	<0.62	0.00 - 1.00	ug/L	
Platinum, Saliva	<0.09	0.00 - 1.00	ug/L	
Rhodium, Saliva	<DL (a)	0.00 - 1.00	ug/L	
Silver, Saliva	3.09 *H	0.00 - 2.00	ug/L	
Tin, Saliva	2.11 *H	0.00 - 2.00	ug/L	

**Integrative Medicine Comments**

Many studies have confirmed the corrosion of dental alloys. They reported that specific metals such as silver, gold, chromium and others were higher in saliva of patients with metal restorations as compared to control patients. Through saliva metal testing we can detect how amalgam metals of fillings or crowns are released into saliva. Saliva metals levels indicate what dental metals were released either before or during the chewing period. By comparing saliva after mastication, it is assumed that the amount of metals released during the chewing period reflect on the stability of the amalgam fillings, and how much mercury and other potentially toxic dental metals are released.

Systemic metal exposure should be confirmed through additional diagnostics.

Tests ordered: SalMet,IMCOM

(\*) Result outside normal reference range

(H) Result is above upper limit of reference rang
