Collection Date : 09-May-2022  
Received Date:09-May-2022

3814192

### BIOCHEMISTRY

BLOOD - SERUM	Result	Range	Units	
Activated Vitamin B12	61.0	23.0 - 100.0	pmol/L	
SERUM FOLATE	24	6 - 45	nmol/L	

#### General Chemistry Comment

#### Serum Folate Comment:

High/Normal Folate levels do not necessarily reflect adequate levels of 5 MTHF (the most readily useable form of folate in the body).

If the serum Folate level is low, look at the Homocysteine level which will be elevated, whilst MMA levels will be normal.

#### Further assessments to consider:

Folate Metabolism Profile (THF, Folinic Acid, 5-MTHF), MTHFR gene status.
